

# Jennie Lee Building Open Day Mass Data Collection Activity Sheet

Use the boxes below to take your readings from the building using the ScienceScope kit. JLB North is the side near the front door, JLB South is the side near the pond.

Use the blank rows to collect data from other surfaces that interest you. Make environmental notes to the side of the table (say it had just rained, or was bright sunshine) together with anything else you think may affect the readings. Do not worry if you only have one sensor. Just enter those readings

Please do not walk across the planted area to the pond or along the south side towards the balcony as these are hazardous areas.

JLB North Readings				
Glass type	Time	Irradiance	Wind Speed	Air Temp
Clear				
Orange				
Pink				
Yellow				
Spotty				

JLB South Readings				
Glass type	Time	Irradiance	Wind Speed	Air Temp
